Re: LaVern Oaks

Dear Dr. Green,

Thank you very kindly for allowing me once again to participate in the care of Mrs. Oaks. I agree that she does have some evidence for congestive heart failure and left chronic atrial fibrillation and probably some angina pectoris. I have changed her medications to Lasix 40 mg each day with Vasotec 5 mg each day. Also she needs to continue her Chlorpropamide 250 mg twice a day.

I have asked her to return to see me in two weeks to follow-up on this regimen.

I appreciate this referral.

Best personal regards,

A handwritten signature in dark ink, appearing to read "Keith".

Keith L. Ritchie, M.D.
